Group Meeting Log #2

When:

- December 1st, 2021 at 8:30 pm - 10:15 pm

Where:

- Discord

Who:

- Charlene Khun

- Minh Nhat Duong

- Arnav Amin

- Benjamin Man

- Arpon Purkayastha

Summary:

- Shared how much progress was made over the Thanksgiving Break. The Welcome Page, HowToPlay Page and Game Questions page are working. The only thing we still need to do is add pictures and decorate.

- **Charlene** has a problem with coding the leaderboard so she brings it in the meeting and asks for advice.

- Got feedback to add a live score to the Game page.

- Helped each other fix errors: redownloading JDK 16.0.1 and installing WindowBuilder.

- Talked more about how to create the leaderboard using File IO.

- Initial plan: JOptionPane dialog box to enter in a player name (rather than JFrame and JTextField), ArrayList of Player objects, sort the array list, and write everything to a file.
- Who contributes what?
    - **Minh** and **Charlene** are working on looking up pictures and adding it to the game page. **Minh** found the pictures and links. **Charlene** is giving feedback to **Minh**.
    - **Arnav** is working on File IO and live score counter.
    - **Arpon** and **Benjamin** are looking for one more piece of music and the correct / incorrect sound effects. After they finish, they will join **Arnav** to work on File IO.
